

Snap-on

A WHOLE NEW CLASS IN HEAVY-DUTY TRUCK DIAGNOSTICS.

ENCYCLOPEDIA COVERAGE FOR CLASS 1 - 8 TRUCKS WITH CODE-SPECIFIC REPAIR GUIDANCE FOR CLASS 4 - 8.

PRO-LINK+[®]

IT'S LIKE WE BUILT A NEW SUPER-HIGHWAY DIRECTLY FROM CODE TO FIXED.

It can be lonely out on the highway.
But you shouldn't feel alone
in the repair bay.

PRO-LINK®+ is your team driver for truck diagnostics. Snap-on has united two of the industry's best – leading diagnostic coverage for Class 1 – 8 trucks integrated with code-specific repair guidance. Together they relieve the frustration and lost time that comes with wondering what to do after pulling a code – whether diagnosing engine, transmission, brake or body faults.

From the common to the rarely seen, a complete diagnostic path is provided: code descriptions, wiring diagrams, connector views, locators, plus testing and repair procedures. Additional advanced OEM-level diagnostic capabilities including live data, calibrations and special tests means the **PRO-LINK®+** won't leave you stranded.

Keeping trucks on the road is critical.

With a majority of semis traveling over 100,000 miles every year, your ability to properly maintain, diagnose and repair them is as crucial as ever. Snap-on is US-based; designing, engineering and supporting professional truck diagnostic hardware and software from the ground up. And we work directly with the OEMs to ensure delivery of advanced coverage and capabilities you can trust.

PRO-LINK®+ is at your side for every vehicle rolling into your bay, helping remind you how good it feels to fix things right again and again.

It's a wealth of information right in your hands. No leaving the vehicle, no searching the internet or information sources. No lost time. When you consider the average diagnostic charge- and multiple uses per day depending on shop size- the return on investment for PRO-LINK®+ can be substantial.

THE LINK TO THE ANSWERS YOU NEED.

PRO-LINK®+ combines hardware and software for the perfect link to the answers you need. The ruggedized platform features the familiar Microsoft® Windows® environment, plus the diagnostic software is all-inclusive, giving you comprehensive coverage for all makes of trucks, engines, transmissions and brakes. And the software subscription delivers uninterrupted access to code-specific information, the latest diagnostic updates, and access to vehicles with Secure Gateways.

HARDWARE

- Rugged yet sophisticated design developed specifically for the heavy-duty shop environment
- 12" capacitive color touchscreen display for improved readability from any angle – and superior visibility indoors or out
- 9-Hour battery life
- Integrated camera with light
- Convenient wired or 5 GHz wireless compatibility
- Industry-standard vehicle communicate interface with Windows®-based hardware for faster speed

COMPLETE CODE-BASED TROUBLESHOOTING INFORMATION

Snap-on proprietary information, specific to the vehicle, system and code being diagnosed.

- Troubleshooting workflow includes code descriptions, testing procedures, component and connector photos, wiring diagrams, specifications and remove and install instructions
- Access to all the information you need at your fingertips, without the need to go anywhere else

DIAGNOSTIC SOFTWARE

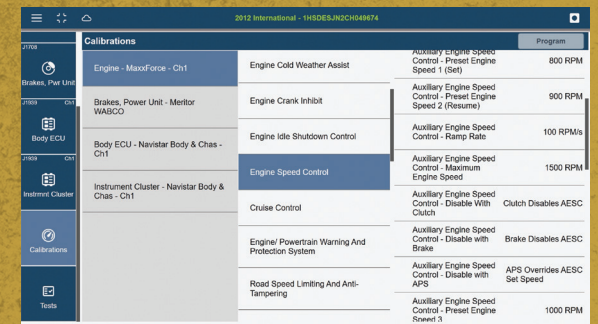

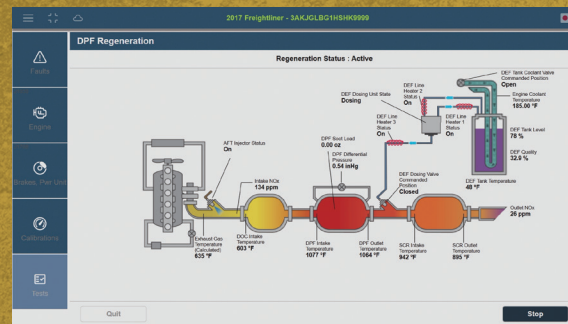

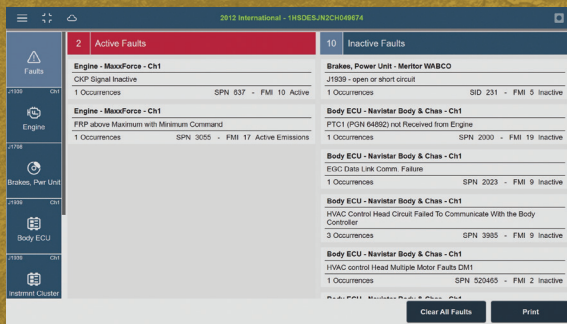

- All-inclusive comprehensive OEM-specific coverage for Class 1-8 engines, transmissions, chassis and brakes
- Live data graphing, component failure testing, plus replacement component programming
- Access to vehicles with Secure Gateways

OEM LICENSED AND APPROVED DATA IN AN AFTERMARKET HANDHELD DIAGNOSTIC SYSTEM

All-inclusive suite of diagnostic software for Class 1-8 trucks – from pickups to semis – including factory-level capabilities for Cummins®, Detroit Diesel®, Caterpillar®, Allison Transmission®, Eaton Transmission®, International®, Paccar®, Freightliner®, Volvo®/Mack®, WABCO® Brakes, Bendix® Brakes, Hino® and many more.

CHART, RESET, TEST & FIX.

COVERAGE, AUTO ID & CODES

Quickly identify fitted systems and see active and inactive fault codes.

SPECIAL TESTS

Ability to perform over 200 OEM Special Tests.

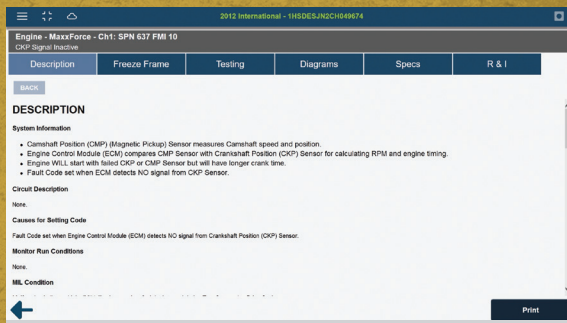

CALIBRATIONS

Adjust over 600 user-configurable parameters.

MAKE GIT IT DONE GOT IT DONE.

Proprietary troubleshooting information saves time with every code by delivering filtered information specific to the class 4-8 truck you're working on.

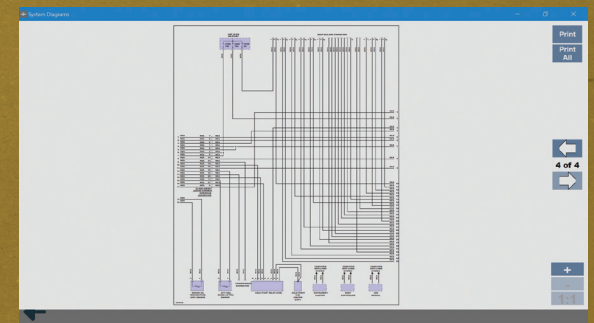

CODE INFO & TESTING

Complete fault code descriptions with step-by-step test steps right in your hand to help speed up your troubleshooting.

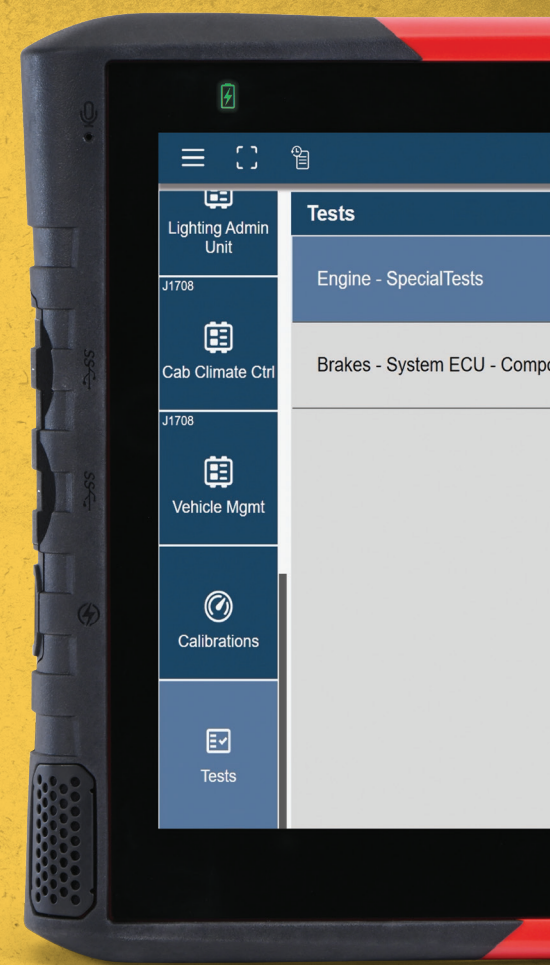

PHOTOS

Thousands of digital photos provide detailed real-world views of components involved with the repair.

WIRING DIAGRAMS

Fault-specific wiring diagrams displaying just the wires making up a particular circuit, plus the entire diagram when needed.
