

## TIRE PRESSURE MONITORING SYSTEMS CERTIFICATION

The **Tire Pressure Monitoring Systems Certification** trains power users of Snap-on TPMS tire diagnostic equipment. Upon successful completion of the certification curriculum and hands-on lab exercises, certified technicians can safely and productively utilize all features found on Snap-on TPMS diagnostic equipment. The curriculum includes training materials and practical lab exercises designed to develop tire service knowledge and professionalism that are **TOOLS FOR LIFE** for those pursuing careers in automotive maintenance technology and collision repair.

The **Tire Pressure Monitoring Systems Certification** includes training in problem-solving with and programming of tire pressure monitoring sensors. Training covers the description, diagnostics, servicing, and programming of the Snap-on TPMS system. The unique design of the class allows students to pressurize and activate sensors in a classroom environment without a wheel and tire assembly.

The **Tire Pressure Monitoring Systems Certification** provides an industry-recognized endorsement of technical expertise and demonstrated ability in tire service. When students successfully complete this Snap-on certification, they possess one of the most requested skills in the industry today.

### COURSE CONTENT INCLUDES:

- Equipment Safety
- Introduction to TPMS
- TREAD Act
- TPMS Types
- TPMS Light Status
- Communication and Frequency
- TPMS service
- TPMS Settings, Testing, and Resetting
- Programming of Sensors
- Advanced Features of TPMS

## BUILDING TOOLS FOR LIFE

Snap-on certifications provide a return on technical education investment through hands-on training and state of the art tools and equipment. The **Tire Pressure Monitoring Systems Certification** connects directly to the following academic subject areas:

- Automotive Maintenance Technology
- Auto Collision Repair & Refinishing

Students earn Snap-on certifications as proof of achievement. These NC3 stackable credentials increase employment potential and on-the-job productivity in industries such as:

- Automotive Repair
- Fleet Maintenance
- Collision Technology
- Light Equipment Maintenance and Repair
