Car-O-Liner to Feature New Collision Repair Technology at SEMA

Wixom, MI – Oct. 22, 2024 – A wide array of Car-O-Liner® collision repair equipment will be on display at the Specialty Equipment Market Association® (SEMA®) show held Nov. 5-8 at the Las Vegas Convention Center.

Car-O-Liner will introduce the BenchRack™ Versa, the latest in-ground innovation in collision repair technology. Made with high-strength steel supports, the aluminum ramps on the *BenchRack* Versa facilitate safe and fast vehicle lifting by the wheels, granting full access to the car for immediate repairs and pre-measuring.

The Snap-on® Total Shop Solutions (TSS)™ booth (#32017) will showcase the *Car-O-Liner* [CMI™ 300 Pulse Welder](#), featuring a double pulse for welding and brazing, a function required by many OEMs. Also on display will be the [CTR™ 9](#) fully automatic, high pressure welder, equipped with a revolutionary lightweight transformer gun, a 355-degree swivel handle with an ergo-grip and a hydraulically assisted tool balancer. Additionally, two industry-leading *Car-O-Liner* workbenches will be featured: the lightweight [SPEED™ 3T](#), capable of supporting vehicles up to three tons and designed for light and medium cosmetic repairs, and the [BenchRack](#) 6300, which combines drive-on convenience with a hydraulic lift and removable ramps. Its tilt feature makes loading easier when approach space is limited.

Car-O-Liner measuring tools at SEMA® will include the [PointX® II](#), offering fast, accurate diagnostic measurements for quicker repairs, and the [Car-O-Tronic®](#), one of the fastest, easiest and most accurate systems for upper and lower body measurements. Other products on display will include the [PNP90 XT²](#) riveting system, the [CBR™ 2000](#) blind riveting tool and the [CDR™ 1](#) cosmetic dent repair workstation. Many *Car-O-Liner* products will be available for hands-on demonstrations, allowing attendees to experience their performance firsthand.

“SEMA is a tremendous opportunity to showcase industry-leading Car-O-Liner technology and advanced collision repair equipment,” said Tim Garner, national accounts & OEM sales manager for Car-O-Liner. “Car-O-Liner delivers unmatched innovation and efficiency, and we encourage SEMA attendees to visit booth #32017 to explore our latest products and discover how these solutions can enhance profitability.”

For more information about the full line of productivity-enhancing *Car-O-Liner* equipment, visit Car-O-Liner.com.
