Mitchell 1 Expands Coverage for Electric Vehicles

Repair Information Software Now Covers 98% of Electric and Hybrid Vehicles

SAN DIEGO, Calif., Aug. 12, 2024 – Mitchell 1 today announced that its auto repair software now provides comprehensive coverage for the majority of electric and hybrid vehicles on the market. This milestone gives shops easy access to factory-direct repair, diagnostic and maintenance information for these advanced vehicles.

Mitchell 1's ProDemand® auto repair information covers manufacturers such as Tesla®, Ford®, Toyota®, Honda®, Kia®, Hyundai® and the Volkswagen® Group, including Audi® and Porsche®.

"We are proud to expand our coverage for EVs and hybrid vehicles to include all the major brands, so our subscribers can quickly access the critical data they need to perform fast and accurate repairs," said Nick DiVerde, senior director, product management for Mitchell 1. "We now cover 98% of all EVs and hybrids, making ProDemand the clear choice when working on these types of vehicles."

With ProDemand, shops can get instant access to OEM repair information and exclusive, expert-based Real Fixes from SureTrack™ in a single lookup. Other features include:

- **1Search® Plus** – This powerful search engine provides technicians with instant access to a comprehensive database via an easy-to-navigate card-based dashboard. It covers all aspects of vehicle repair, including OEM procedures, TSBs, wiring diagrams and specifications.
- **Advanced Interactive Wiring Diagrams** – The award-winning diagrams make it easy for technicians to visualize and repair complex electrical systems. They feature interactive tools that take them directly to the specific diagram for the component searched for – with traces automatically highlighted.
- **ADAS Quick Links** – This feature gives technicians a comprehensive view of advanced driver assistance systems (ADAS) on a vehicle – all in one place. It simplifies diagnosing, repairing and calibrating vehicles with ADAS sensors, such as blind spot monitoring and adaptive cruise control.
