SUN Collision Integrates with Manager SE / ShopKey Management Systems

SAN DIEGO, Calif., Nov. 13, 2024 – SUN® Collision announced it has integrated shop management capabilities with its award-winning collision repair software, enabling auto body shops to manage all aspects of their business on a single platform. SUN Collision Repair Information is now fully compatible with Mitchell 1's Manager® SE software and the Snap-on® ShopKey Shop Management solution. SUN, Mitchell 1 and ShopKey are part of the Snap-on Total Shop Solutions family of brands.

"This integration of these industry-leading tools elevates our collision repair software to new heights. It makes it easier than ever for independent shops to manage both collision and mechanical repairs while overseeing their day-to-day operations," said Chris Bonneau, SUN Collision business manager. "With this powerful combination, shops can now focus on what truly matters – delivering exceptional service and getting vehicles back on the road faster in safe operating condition."

The business management tools help shops streamline workflows and track shop activity – from estimates for mechanical repairs through invoicing. By replacing manual tasks with automation, the software enables shops to manage repairs, customer service and business operations more efficiently and profitably.

Among its comprehensive features, the shop management software provides the largest choice of electronic parts catalogs, an interactive work-in-progress dashboard, over 180 integrated reports, plate-to-VIN decoding and mobile digital inspections. Additionally, it includes integrated communication tools for appointment scheduling, approvals and invoicing.

SUN Collision Repair Information provides easy access to both OEM collision and mechanical repair data through a single login. With on-demand access to current repair specifications and procedures, SUN Collision supports all makes and models, including most electric and hybrid vehicles, and those equipped with advanced driver assistance systems (ADAS).

ABOUT SUN COLLISION
SUN® Collision Repair Information, a brand of Snap-on, Inc., provides complete, accurate OEM data for collision and mechanical repairs that auto body shops can trust to fix any vehicle with maximum efficiency. Powered by its exclusive 1Search Plus search engine, the online software makes it quick and easy to access current repair procedures, diagrams and specifications for all makes, including the majority of electrical vehicles on the market and vehicles equipped with advanced driver assistance systems (ADAS). For information about SUN Collision and its products, call 877-840-1973 or visit suncollision.com.
